SUMMARY

Passionate and detail-oriented candidate with a strong foundation in Data Analytics and Automation. Experienced in data cleaning, workflow optimization, and utilizing Generative AI (ChatGPT, Gemini) to streamline manual operations. Eager to apply analytical thinking and technical skills to support business growth and operational efficiency at Rise Capital.

WORK EXPERIENCE

Data Analyst | Newgen Invest

03/2026 – Present

- Collected, cleaned, and standardized raw lead data from multiple sources, ensuring data consistency and internal security.
- Automated daily operational reports and built a Mini CRM on Google Sheets using advanced formulas (IMPORTRANGE, QUERY, FILTER) and Google Apps Script, enabling real-time performance tracking for management.
- Leveraged AI tools (ChatGPT, Gemini) to optimize manual tasks, write complex formulas, and design structured data-entry templates.

Data Operation Intern | ATG

10/2025 – 12/2025

- Validated 1,000+ daily operational records against legal documents with 99% accuracy.
- Moderated 1,500+ job postings on boss.vn to ensure content quality and data consistency.

PROJECTS

MoMo Top Up

04/2026 – 05/2026

github.com/hoangf384/MoMo-Top-Up

- Analyzed over **13.4K+ transactions (694.6M GMV)** to evaluate platform performance, identifying a **stable 51K VND AOV** and discovering strong Q3-Q4 seasonal growth drivers.
- Applied the **Pareto (80/20) principle** to segment user behavior, uncovering that the **top 20% of active users contribute 65% of total revenue**, and proposed a targeted VIP Loyalty program to mitigate churn.
- Conducted **cohort and demographic analysis** to optimize marketing ROI, identifying **users aged 23–32 in major cities** as the **highest-converting segment to refine user acquisition strategies**.
- Evaluated partner performance across 5 active telcos to address concentration risks, formulating **cross-selling promotions** to stimulate mid-tier merchants (Vinaphone, Mobifone) and reduce heavy reliance on Viettel.

Personal Finance Behavioral Analytics | Group Project

05/2025 – 07/2025

github.com/hoangf384/pf-visualization

- Simulated a highly realistic financial dataset of 20,000 users using **Python (SciPy, NumPy)**, applying **multivariate normal distributions** and correlation matrices based on U.S. BLS data to overcome survey limitations.
- Designed an interactive **Tableau dashboard** tailored for Product and Growth teams, enabling robust demographic segmentation to uncover hidden financial behaviors and user pain points.
- Extracted a crucial product insight: the 18–25 age cohort suffers a **–26.9% savings rate** driven primarily by early-month fixed costs, invalidating the assumption of high discretionary spending (~8%).
- Formulated an actionable **A/B testing strategy** proposing “Proactive Pacing Alerts” to replace traditional reactive reporting, aiming to intervene in real-time and improve user savings rates.

TECHNICAL SKILLS

Tools & AI : MS Excel (Pivot Tables, Advanced Formulas), Google Sheets, Prompt Engineering (ChatGPT, Gemini)
Programming : Python (Pandas, Polars, PySpark), SQL, Google Apps Script, R
Databases : MySQL, SQL Server, BigQuery
Cloud Platforms : GCP (GCS), AWS (EC2, S3, IAM)
Visualization : Tableau, Looker Studio, Power BI
Other Tools : Git, Docker

EDUCATION & QUALIFICATIONS

Management Information Systems | HUB

10/2022 – 03/2026

- Specialization: Business Data Science GPA: 3.2/4.0
- Semi-finalist - Data Analytics Competition 2024 (Organized by HUB University).

Google Data Analytics Professional Certificate

VSTEP – Level 4 (B2 CEFR)

Harness Engineering for AI Agents (WalkingLabs)
