SUMMARY

Final years in **Management Information Systems** with a focus on understanding the business logic behind the data. I use **SQL, Python, and BI tools** to turn practical business questions into clear, easy-to-understand dashboards. **Detail-oriented and eager to learn**, I am looking for a Data Analyst Internship role where I can go beyond basic reporting to provide useful insights that help the team make better decisions.

TECHNICAL SKILLS

Programming : Python (Pandas, Polars, PySpark), SQL, R
Databases : MySQL, BigQuery, SQL Server, DuckDB
Data Tools : MS Excel, dbt, Jupyter Notebook
Cloud Platforms : GCP (GCS, BigQuery)
Visualization : Tableau, Looker Studio, Power BI
Other Tools : Git, Docker

PROJECTS

Customer Behavioral Analytics Pipeline 11/2025 – Present
github.com/hoangf384/Bigdata

- Processed and unified complex, multi-format raw datasets (JSON, CSV) using **PySpark**, ensuring high data quality and consistency for downstream behavioral analysis.
- Structured a logical **Medallion data architecture** (Bronze-Silver-Gold) on **Google Cloud Storage** to systematically transform raw user logs into optimized, query-ready tables.
- Developed scalable **ELT data models** in **BigQuery** using **dbt**, creating clean, business-ready mart tables (Gold layer) designed specifically to track key customer metrics.
- Currently developing high-performance BI dashboards in **Looker Studio**, leveraging pre-calculated metrics from **Gold-layer mart tables** to deliver automated downstream analytics.

Personal Finance Behavioral Analytics | Group Project 05/2025 – 07/2025
github.com/hoangf384/pf-visualization

- Simulated a highly realistic financial dataset of 20,000 users using **Python (SciPy, NumPy)**, applying **multivariate normal distributions** and correlation matrices based on U.S. BLS data to overcome survey limitations.
- Designed an interactive **Tableau dashboard** tailored for Product and Growth teams, enabling robust demographic segmentation to uncover hidden financial behaviors and user pain points.
- Extracted a crucial product insight: the 18–25 age cohort suffers a **–26.9% savings rate** driven primarily by early-month fixed costs, invalidating the assumption of high discretionary spending (~8%).
- Formulated an actionable **A/B testing strategy** proposing “Proactive Pacing Alerts” to replace traditional reactive reporting, aiming to intervene in real-time and improve user savings rates.

WORK EXPERIENCE

Data Operation Intern | ATG 10/2025 – 12/2025

- Validated 1,000+ daily operational records against legal documents with 99% accuracy.
- Moderated 1,500+ job postings on boss.vn to ensure content quality and data consistency.

SEO On-page Intern | ECXO 09/2025 – 10/2025

- Optimized titles, meta descriptions, and breadcrumbs for 50+ pages.
- Implemented internal links, increasing crawlability and organic impressions by 10%.

EDUCATION & QUALIFICATIONS

Management Information Systems | HUB 10/2022 – 03/2026

- Specialization: Business Data Science GPA: 3.2/4.0
- Semi-finalist - Data Analytics Competition 2024 (Organized by HUB University).

Google Data Analytics Professional Certificate

VSTEP – Level 4 (B2 CEFR)

Microsoft Office Specialist (MOS – 2016)
