SUMMARY

Driven by a commitment to operational excellence and continuous learning, I am deeply passionate about Process Optimization, Business Operations, and Data-Driven Strategy. My long-term ambition is to architect and execute highly efficient operational workflows that foster sustainable business growth, anchored by a strong work ethic and a results-oriented mindset.

WORK EXPERIENCE

Operations Administrator (Data) | Newgen Invest 03/2026 – Present

- Developed and maintained a centralized lead management system (Mini CRM) on Google Sheets, streamlining workflow processes and enforcing data access security policies across Sales teams.
- Optimized lead distribution operations by matching lead quality with sales representative performance, resulting in higher closing rates and maximized daily sales productivity.
- Automated operational metrics tracking and daily reporting workflows, building real-time dashboards to facilitate data-driven decision-making for management.

Operations Intern | ATG 10/2025 – 12/2025

- Managed daily operations by validating 1,000+ transaction and operational records against compliance and legal documents with a 99% accuracy rate.
- Supervised content moderation for over 1,500 job postings on boss.vn, ensuring database integrity, data quality, and compliance with platform standards.
- Collaborated with cross-functional teams to resolve operational bottlenecks and streamline database entry processes.

SEO Intern | ECXO 09/2025 – 10/2025

- Managed on-page optimization workflows for 50+ landing pages, refining metadata, headers, and breadcrumbs to improve site structure and user experience.
- Implemented internal linking strategies, enhancing search engine crawlability and driving a 10% increase in organic impressions.

PROJECTS

MoMo Top Up | Transactional Operations Analysis 04/2026 – 05/2026

github.com/hoangf384/MoMo-Top-Up

- Analyzed over **13.4K+ transactions (694.6M GMV)** to assess platform operational performance, identifying average order value (AOV) trends and seasonal demand drivers to optimize supply-chain and partner resource planning.
- Applied the **Pareto (80/20) principle** to segment customer behavior, identifying key segments contributing to 65% of revenue, and proposed loyalty programs to improve customer retention and lifetime value.
- Conducted **cohort and demographic analysis** to optimize marketing ROI, identifying major city users aged 23–32 as the highest-converting segment to refine target customer acquisition.
- Evaluated partner performance and concentration risks across 5 active telcos, formulating cross-selling campaigns to boost mid-tier telco transactions and diversify vendor dependencies.

Personal Finance Behavioral Analytics | Group Project 05/2025 – 07/2025

github.com/hoangf384/pf-visualization

- Simulated behavioral datasets for 20,000 users using **Python (SciPy, NumPy)**, generating realistic scenarios based on U.S. BLS data to analyze consumer spending patterns and savings bottlenecks.
- Created interactive **Tableau dashboards** for product and operations teams to analyze demographic segments, uncover operational pain points, and drive product feature optimizations.
- Discovered that the 18–25 age cohort had a negative savings rate (-26.9%) due to early-month fixed costs, leading to a recommendation for dynamic budget pacing features.
- Formulated an **A/B testing and implementation plan** for proactive spending notifications, designing the operational workflows for real-time user intervention.

SKILLS

Operations & Data Tools : MS Excel & Google Sheets (Advanced CRM setup, IMPORTRANGE, Query), Jira, Trello

Databases & Querying : SQL, MySQL, SQL Server, BigQuery

Data Visualization : Tableau, Looker Studio, Power BI

Programming & Scripting : Python (Pandas, Automation scripts), R

Methodologies : Process Mapping, Lead Management, Operational Reporting, A/B Testing

Other Tools : Git, Docker, AI Tools (Antigravity-ide, Antigravity-cli)

EDUCATION & QUALIFICATIONS

Management Information Systems | HUB 10/2022 – 03/2026

- Specialization: Business Data Science | GPA: 3.2/4.0
- Semi-finalist - Data Analytics Competition 2024 (Organized by HUB University).

Google Data Analytics Professional Certificate

VSTEP – Level 4 (B2 CEFR)

Harness Engineering for AI Agents (WalkingLabs)
