

NGUYEN PHAN HOANG PHUC

Trading Analyst - Quant Research

Thu Duc, HCMC | (84) 854 519 237 | phuchoang0308@gmail.com
github.com/hoangf384 | in/hoangf384

SUMMARY

Quantitative-focused MIS graduate specializing in **Business Data Science**. Passionate about applying **Probability & Statistics**, **Time-Series Analysis**, and data modeling (Python, R) to analyze price action, perform risk checks, and construct algorithmic trading models. Strong problem-solving mindset, fast learner, and eager to undergo intensive training at Fin20.

WORK EXPERIENCE

Data Analyst | Newgen Invest 03/2026 – Present

- Designed and maintained a centralized lead management system (Mini CRM) on Google Sheets to optimize operational workflow and allocate leads based on sales performance.
- Extracted sales metrics and built automated daily/weekly reporting pipelines using advanced formulas (IMPORTRANGE, QUERY, FILTER), delivering real-time dashboards to facilitate strategic decisions.

Data Operation Intern | ATG 10/2025 – 12/2025

- Performed database audit and compliance validation for 1,000+ daily operational transactions, mitigating operational risks and maintaining a 99% accuracy rate.
- Moderated and standardized 1,500+ job posting entries on boss.vn, resolving metadata anomalies to maintain database integrity.

PROJECTS

MoMo Top Up | Transaction & Behavioral Analytics 04/2026 – 05/2026

github.com/hoangf384/MoMo-Top-Up

- Analyzed time-series data of over **13.4K+ transactions (694.6M GMV)** using **Python (Pandas)** and **SQL** to assess platform performance, identifying stable AOV trends and discovering seasonal demand growth drivers.
- Applied the **Pareto (80/20) principle** to segment customer behavior, identifying that the top 20% of users contribute 65% of revenue, and proposed loyalty programs to retain core users and minimize churn.
- Conducted **cohort and demographic analysis** to optimize marketing ROI, identifying major city users aged 23–32 as the highest-converting segment to refine target customer acquisition.
- Evaluated partner performance across 5 telcos to address concentration risks, formulating cross-selling promotions to boost mid-tier telco transactions and diversify vendor dependencies.

Personal Finance Behavioral Analytics | Group Project 05/2025 – 07/2025

github.com/hoangf384/pf-visualization

- Simulated a highly realistic financial dataset of 20,000 users using **Python (SciPy, NumPy)**, applying **multivariate normal distributions** and correlation matrices based on U.S. BLS data to overcome survey limitations.
- Designed an interactive **Tableau dashboard** tailored for Product and Growth teams, enabling robust demographic segmentation to uncover hidden financial behaviors and user pain points.
- Extracted a crucial product insight: the 18–25 age cohort suffers a **–26.9% savings rate** driven primarily by early-month fixed costs, invalidating the assumption of high discretionary spending (~8%).
- Formulated an actionable **A/B testing strategy** proposing “Proactive Pacing Alerts” to replace traditional reactive reporting, aiming to intervene in real-time and improve user savings rates.

TECHNICAL SKILLS

Quantitative Methods : Probability & Statistics, Time-Series Analysis, Applied Machine Learning
Programming & Models : Python (Pandas, Polars, SciPy, NumPy, Statsmodels), R, SQL, Pine Script (Basic)
Databases & Tools : MySQL, BigQuery, SQL Server, Excel, Jupyter Notebook
Visualization : Tableau, Looker Studio, Power BI
Other Tools : Git, Docker

EDUCATION & QUALIFICATIONS

Management Information Systems | HUB 10/2022 – 03/2026

- Specialization: Business Data Science GPA: 3.2/4.0
- Semi-finalist - Data Analytics Competition 2024 (Organized by HUB University).

Google Data Analytics Professional Certificate

VSTEP – Level 4 (B2 CEFR)

Harness Engineering for AI Agents (WalkingLabs)
