

NGUYEN PHAN HOANG PHUC

Business Analyst Intern

Thu Duc, HCMC | (84) 854 519 237 | phuchoang0308@gmail.com
github.com/hoangf384 | in/hoangf384

SUMMARY

MIS student with a solid foundation in database management and business processes. Seeking a Business Analyst Intern position to learn requirements gathering and team coordination in a real-world software development environment. Strong communication and analytical skills.

WORK EXPERIENCE

Data Analyst | Newgen Invest

03/2026 – Present

- Built a Mini CRM on Google Sheets to combine scattered data into one master sheet and set up privacy rules for each Sales team.
- Distributed leads based on performance, assigning the best leads to the teams with the highest closing rates to maximize revenue.
- Automated daily reports using formulas (e.g., IMPORTRANGE) to turn raw data into real-time dashboards for tracking sales progress.

Data Operation Intern | ATG

10/2025 – 12/2025

- Validated 1,000+ daily operational records against legal documents with 99% accuracy.
- Moderated 1,500+ job postings on boss.vn to ensure content quality and data consistency.

PROJECTS

MoMo Top Up

04/2026 – 05/2026

github.com/hoangf384/MoMo-Top-Up

- Analyzed over **13.4K+ transactions (694.6M GMV)** to evaluate platform performance, identifying a **stable 51K VND AOV** and discovering strong Q3-Q4 seasonal growth drivers.
- Applied the **Pareto (80/20) principle** to segment user behavior, uncovering that the **top 20% of active users contribute 65% of total revenue**, and proposed a targeted VIP Loyalty program to mitigate churn.
- Conducted **cohort and demographic analysis** to optimize marketing ROI, identifying **users aged 23–32 in major cities** as the **highest-converting segment to refine user acquisition strategies**.
- Evaluated partner performance across 5 active telcos to address concentration risks, formulating **cross-selling promotions** to stimulate mid-tier merchants (Vinaphone, Mobifone) and reduce heavy reliance on Viettel.

Personal Finance Behavioral Analytics | Group Project

05/2025 – 07/2025

github.com/hoangf384/pf-visualization

- Simulated a highly realistic financial dataset of 20,000 users using **Python (SciPy, NumPy)**, applying **multivariate normal distributions** and correlation matrices based on U.S. BLS data to overcome survey limitations.
- Designed an interactive **Tableau dashboard** tailored for Product and Growth teams, enabling robust demographic segmentation to uncover hidden financial behaviors and user pain points.
- Extracted a crucial product insight: the 18–25 age cohort suffers a **–26.9% savings rate** driven primarily by early-month fixed costs, invalidating the assumption of high discretionary spending (~8%).
- Formulated an actionable **A/B testing strategy** proposing “Proactive Pacing Alerts” to replace traditional reactive reporting, aiming to intervene in real-time and improve user savings rates.

TECHNICAL SKILLS

Core Methodology : Requirements Gathering, Business Process Mapping, Team Collaboration

Databases & SQL : SQL (MySQL, SQL Server), Database Analysis

Data Tools : MS Excel (Pivot Tables, Advanced Formulas, VLOOKUP), Google Sheets

Visualization : Tableau, Looker Studio, Power BI

Programming : Python (Pandas), R, Google Apps Script

Other Tools : Git, Docker, English (Professional Communication & Reading - B2 CEFR)

EDUCATION & QUALIFICATIONS

Management Information Systems | HUB

10/2022 – 03/2026

- Specialization: Business Data Science GPA: 3.2/4.0
- Semi-finalist - Data Analytics Competition 2024 (Organized by HUB University).

Google Data Analytics Professional Certificate

VSTEP – Level 4 (B2 CEFR)

Harness Engineering for AI Agents (WalkingLabs)
