SUMMARY

Detail-oriented and proactive MIS graduate with a strong background in **Business Data Science**. Eager to apply data collection, data cleaning, and data analysis skills (Excel, SQL, Python) to monitor sales performance, update orders, and build reports for VTV-Hyundai. Strong teamwork skills, responsible, and committed to data accuracy and operational support.

WORK EXPERIENCE

Data Analyst | Newgen Invest 03/2026 – Present

- Collected and standardized raw lead data on Google Sheets, building a centralized system (Mini CRM) to support lead distribution and sales productivity.
- Extracted performance metrics and built automated reporting pipelines using advanced formulas (e.g., IMPORTRANGE, QUERY, FILTER) to monitor revenue, sales trends, and team productivity.

Data Operation Intern | ATG 10/2025 – 12/2025

- Audited and cross-checked 1,000+ daily operational records against legal documents to ensure accuracy and compliance, maintaining a 99% data integrity rate.
- Moderated, verified, and standardized metadata for over 1,500 listings on boss.vn to ensure database consistency.
- Supported administrative tasks, document archiving, and system data entry operations.

PROJECTS

MoMo Top Up | Sales & Transaction Performance Analysis 04/2026 – 05/2026

github.com/hoangf384/MoMo-Top-Up

- Analyzed time-series data of over **13.4K+ transactions (694.6M GMV)** to monitor sales performance, track orders, and discover seasonal revenue growth drivers.
- Applied the **Pareto (80/20) principle** to segment customer behavior, identifying that the top 20% of users contribute 65% of revenue, and proposed loyalty programs to retain core users.
- Conducted **cohort and demographic analysis** to optimize marketing ROI, identifying major city users aged 23–32 as the highest-converting segment to refine target customer acquisition.
- Evaluated partner performance across 5 telcos to address concentration risks, formulating cross-selling promotions to boost mid-tier telco transactions.

Personal Finance Behavioral Analytics | Group Project 05/2025 – 07/2025

github.com/hoangf384/pf-visualization

- Simulated a highly realistic financial dataset of 20,000 users using **Python (SciPy, NumPy)**, applying **multivariate normal distributions** and correlation matrices based on U.S. BLS data to overcome survey limitations.
- Designed an interactive **Tableau dashboard** tailored for Product and Growth teams, enabling robust demographic segmentation to uncover hidden financial behaviors and user pain points.
- Extracted a crucial product insight: the 18–25 age cohort suffers a **–26.9% savings rate** driven primarily by early-month fixed costs, invalidating the assumption of high discretionary spending (~8%).
- Formulated an actionable **A/B testing strategy** proposing “Proactive Pacing Alerts” to replace traditional reactive reporting, aiming to intervene in real-time and improve user savings rates.

TECHNICAL SKILLS

Analysis & Reporting : Business Data Collection, Periodic Reporting (Excel, PowerPoint), Trend Analysis, Data Audit

Office Tools : MS Excel (Pivot Tables, Advanced Formulas, VLOOKUP), MS PowerPoint, Word

Data Tech : SQL (MySQL, SQL Server), Python (Pandas, Polars, Scikit-learn), R

Data Visualization : Tableau, Looker Studio, Power BI

Other Tools : Git, Docker, English (Basic Communication & Reading comprehension - B2 CEFR)

EDUCATION & QUALIFICATIONS

Management Information Systems | HUB 10/2022 – 03/2026

- Specialization: Business Data Science GPA: 3.2/4.0
- Semi-finalist - Data Analytics Competition 2024 (Organized by HUB University).

Google Data Analytics Professional Certificate

VSTEP – Level 4 (B2 CEFR)

Harness Engineering for AI Agents (WalkingLabs)
