SUMMARY

Driven by a commitment to continuous learning and excellence, I am deeply passionate about Data Analytics, Strategy, and Business Growth. My long-term ambition is to architect impactful, data-driven business strategies that foster sustainable success, anchored by a strong work ethic and a results-oriented mindset.

WORK EXPERIENCE

Data Admin | Newgen Invest 03/2026 – Present

- Built a central Mini CRM on Google Sheets, consolidating scattered data source into a single source of truth with customized access control for sales teams.
- Analyzed sales conversion metrics to optimize lead distribution, routing high-potential leads to top-performing agents to maximize conversion rates.
- Automated daily performance reporting pipelines using advanced formulas (IMPORTRANGE, QUERY), reducing manual reporting time by 80% and delivering real-time insights to management.

Data Operation Intern | ATG 10/2025 – 12/2025

- Performed data quality validation for 1,000+ daily operational records, ensuring 99% data integrity and consistency for downstream reporting.
- Moderated and standardized 1,500+ job posting entries on boss.vn, resolving metadata discrepancies and improving platform search accuracy.

PROJECTS

Customer Behavioral Analytics Pipeline 11/2025 – 03/2026

github.com/hoangf384/Bigdata

- Engineered a containerized **PySpark batch ingestion pipeline** to extract and unify multi-format raw datasets (JSON, CSV, Parquet) from diverse operational modules.
- Architected a scalable **Medallion data workflow (Bronze-Silver-Gold)**, utilizing **Google Cloud Storage** as the **Bronze data lake** by converting raw logs into optimized Parquet files.
- Orchestrated **ELT transformations** in **BigQuery** using **dbt**, modeling **external GCS tables** into staging, intermediate (**Silver**), and business-ready mart tables (**Gold**).
- Integrated **Gold-layer mart tables** with **Looker Studio** or **Metabase**, delivering high-performance, automated Business Intelligence dashboards for downstream analytics.

MoMo Transaction & Behavioral Analytics 04/2026 – 05/2026

github.com/hoangf384/MoMo-Top-Up

- Analyzed over **13.4K+ transactions (694.6M GMV)** using **Python (Pandas)** and **SQL** to evaluate platform performance, identifying a **stable 51K VND AOV** and discovering strong Q3-Q4 seasonal growth drivers.
- Developed a **user behavioral segmentation model** combining the **Pareto (80/20) principle** and statistical clustering, identifying that the **top 20% of active users contribute 65% of total revenue** to propose a VIP loyalty program.
- Conducted **cohort and demographic analysis** using **Tableau** to optimize marketing ROI, identifying **users aged 23–32 in major cities** as the **highest-converting segment to refine user acquisition strategies**.
- Evaluated partner performance across 5 active telcos to address concentration risks, formulating **cross-selling promotions** to stimulate mid-tier merchants (Vinaphone, Mobifone) and reduce heavy reliance on Viettel.

TECHNICAL SKILLS

Programming : Python (Pandas, Polars, Scikit-learn), SQL, R

Databases : PostgreSQL, MySQL, SQL Server, BigQuery

BI & Visualization : Tableau, Looker Studio, Power BI

Data Engineering : ETL/ELT Pipelines, dbt, Apache Spark (PySpark), Apache Airflow (Basic)

AI & Cloud Tools : GCP, AWS (S3, EC2), Git, Docker, Harness Engineering (AI Workflow Automation)

EDUCATION & QUALIFICATIONS

Management Information Systems | HUB 10/2022 – 03/2026

- Specialization: Business Data Science GPA: 3.2/4.0
- Semi-finalist - Data Analytics Competition 2024 (Organized by HUB University).

Google Data Analytics Professional Certificate

VSTEP – Level 4 (B2 CEFR)

Harness Engineering for AI Agents | WalkingLabs
